WORK EXPERIENCE

Senior Game Developer

September 2024 - January 2025

Freelance

- Led development of a web-based casino platform (Rocket Crash & Card Game) in Cocos Creator, reducing average scene load time by ~35% (4.0 s → 2.6 s) in internal play tests.
- Delivered Rocket Crash client independently in 4 weeks, achieving 80%+ positive feedback from 12 internal play-testers and zero critical bugs in alpha.
- Engineered client/server architecture for Card Game with Colyseus (Socket.io), built automated stress-test scripts to ensure low-latency multiplayer sessions.
- Optimized development workflow by introducing a Git feature-branch strategy (60% fewer merge conflicts) and setting up Vercel CI/CD, cutting deployment time by ~40%.

Tech Stack: Cocos Creator, Colyseus, TypeScript, Git, Vercel Hosting

Assistant Project Manager

June 2023 - December 2024

ConceptX Co. Ltd.

- Managed end-to-end delivery of LMS, School Management System, and CIS website—delivering all three projects on average 2 weeks ahead of schedule.
- Directed project planning by creating and refining 50+ sprint timelines in Jira, coordinating 4 cross-functional teams (Dev, QA, UX, Content) to achieve 95% on-time task completion.
- Tracked milestones & led QA from development to post-release, reducing critical bugs by 40% through bi-weekly stakeholder demos and a structured UAT process.
- Produced comprehensive documentation (20+ pages of process guides and runbooks), which cut new-hire ramp-up time by ~30%. **Project Link:** class.conceptxmm.com

Tech Stack: Google Sheets, Jira, PowerPoint, Git, Google Meet

Computer Science Teacher

June 2022 - May 2024

ConceptX International School

- Instructed 150+ secondary and IGCSE students in Python, HTML, CSS, and C#, achieving an 80% rate of Grade 8(A*) results on IGCSE examinations.
- Designed and delivered engaging, project-based lessons to foster hands-on learning and critical thinking.
- Served as homeroom teacher, managing daily affairs for a class of 30 students and improving overall attendance by 10%.
- Created curriculum-aligned assessments and guided students through real-world coding projects, resulting in 90% of students submitting functional Python applications by term end.

Game Developer

October 2019 - April 2022

Game Factory

- Developed and launched cross-platform apps and games using Unity and Cocos Creator, targeting Android and iOS.
- Designed an intuitive UI and core gameplay with localization, integrated Firebase, APIs, and phone authentication for secure access.
- Implemented social media logins for smooth onboarding and led development of achievements, in-game shop, and data management systems.
- Developed and launched "Farm Game" on Google Play, achieving over 1,000 downloads.

Tech Stack: Unity, Cocos Creator, C#, TypeScript, Git, Firebase, SQL

Junior AR Developer

August 2018 - September 2019

360ed Co. Ltd.

- Developed an AR-based Android app using Unity and Vuforia, delivering immersive educational experiences.
- Designed intuitive UI/UX for both main app navigation and augmented reality interactions.
- Collaborated in cross-functional teams to ensure stable performance and AR rendering.

Tech Stack: Unity, C#, Vuforia, Git

ABOUT ME

Results-driven Game Developer with 5+ years of experience delivering high-impact games and managing full-cycle IT projects. Expert in C#, Python, TypeScript, and JavaScript, with hands-on mastery of Unity, Cocos Creator, and AR frameworks. Proven track record of accelerating feature delivery by 25% through optimized workflows and integrating third-party APIs to elevate user engagement and retention.
